Profil

Web Developer with a degree in Computer Engineering from the Universitas Pendidikan Indonesia, with experience building websites and admin dashboards using PHP, Laravel, and CodeIgniter, as well as knowledge of Next.js and Python. Experienced in network configuration and technical support, and a graduate of the Coding Camp 2025 (DBS Foundation) program in the Machine Learning track. Seeking a Web Developer position to build reliable and user-friendly web applications.

Keahlian

- **Language: PHP, Javascript, Python**
- **Framework: Codeigniter, Laravel, Nextjs, Flask**
- **Database: Mysql**
- **Tools: Git/GitHub, Postman, dan Figma**

Pengalaman

IT Support • Lembaga Pelatihan Kerja KANIRA
(Juli - September, 2022) | Kabupaten Bandung, Indonesia

- Developed a promotional website for the LPK and created a dashboard for managing the content to be displayed on the website. The website was built using PHP.
- Performed maintenance on all computers at the LPK.
- Assisted participants when they encountered difficulties using the computers.
- Designing and configuring the local area network (LAN/WLAN) at the LPK by installing and optimizing routers and access points to ensure stable internet connectivity across 11 computers.

Robotics Trainer • PT Air Consulting Group - AfterSchola
(Agustus - Desember, 2025) | Kabupaten Bandung, Indonesia

- Designing a robotics curriculum for middle and high school students includes 32 modules/sessions, ranging from learning about LEDs to assembling a line-following robot.
- Developing instructional materials and hands-on modules for use by trainers and students in the classroom.
- Designing and assembling four educational robots based on the Arduino Uno microcontroller.
- Training instructors in electronics and robotics so they can teach classes independently.
